Railing Cleaning Instructions

Although Ultra Aluminum products are designed to require a minimal amount of maintenance, keeping your fence/railing looking its best is no different than any other item around your home, an occasional cleaning goes a long way. Over time, any painted surface exposed to the elements will start to show signs of weathering such as a slight color change or a dulling of the finish. **This is especially true with products exposed to salt,** which can be extremely corrosive as any car owner who's experienced winter weather can attest to!

The Ultra Aluminum Powercoat™ finish offers you some of the best protection available against these elements, but a simple, regular cleaning is necessary to maintain the appearance.

We recommend an occasional wash using warm water and a non-abrasive, pH neutral detergent applied with a soft cloth, sponge or soft bristle brush. Popular household cleaners like Windex®, Fan-tastik® and Simple Green® are examples of safe cleaners to use. The surface should be thoroughly rinsed after cleaning to remove residue. The use of a pressure washer is not suggested. Do not use solvent-based products to clean your fence/railing.

Although the frequency of cleaning depends on environment and location, in cases of salt water exposure, Ultra requires these guidelines be followed and recorded every 3-4 months in order to process a warranty claim.
